# You will need the following?

The Latest JDK 8 (which will include JavaFX 8)

A version of Eclipse 4.3 or greater, you can that here

The e(fx)clipse plugin. The easiest way is to download the preconfigured distro from the [e\(fx\)clipse website](#).

[Scene Builder 2.0](#) or greater

# Eclipse Configuration

We need to tell Eclipse to use JDK 8 and also where it will find the Scene Builder: See instructions in **Lab01**
